

Jafar Mustafazade

Back-end Developer

I am an IT student with good programming skills and an incredible drive to always learn something new. I have experience working in diverse teams and using a wide range of digital tools. I'm always looking for ways to fulfill my dreams, like one day creating an amazing video game.

- SQL SSMS
- Kdenlive

Experience

2024

AzUAC/FFB | 5 Ayna Sultanova St., Baku

Teknofest Participant - Interface Developer

- Team job was to create ai powered robot for preventing forest fire where my job was to create interface between hardware parts and user.
- I worked closely with clients to gather requirements and translate them into technical specifications for implementation. In the result of team work cost of robot was relatively cheap, around 352\$.
- I also participated in regular code reviews, ensuring high-quality standards were consistently met across all development efforts.

2024

Code Academy | 203B Nizami St., Baku

Final Project - Student Information System

- It was final project as exam of 4 month education within university and Code Academy. Given time for project was 21 days.
- I Continuously updated personal website with performance features in order to get more satisfied user experience (around 20 commits on master branch).

2021/2022 and 2022/2023

AzUAC | 5 Ayna Sultanova St., Baku

ICPC Participant

- ICPC is International Collegiate Programming Contest. In other words, a competitive programming competition, where our team of 3 students took place in name of our university.
- Acted as a team leader while delegating tasks and providing feedback.
- By demonstrating programming and task management skills from competition to completion, we were able to place 149th out of over 1000 teams from all over Europe.
